

## **Additional Materials Instructions**

### **Animal cards:**

Once the children are in their groups of three ask the group to join the other group of three whose animal comes from the same environment. The group size will then be a six, a good size for a problem solving task!

Once the group of three have made a creative animal from the cards by using a head, body and legs from different animals ask the group to act out how that animal might move, make noises etc.
